

Rockford Chimney Supply: Freestanding Stove Through Pitched Ceiling

If you're installing a freestanding stove in a room with a pitched ceiling, this guide will help you figure out the stove pipe and chimney pipe lengths needed! We've narrowed in on all of the measurements you'll need to gather. With these measurements, you can put together a parts list on our website or send the measurements off to us and one of our Certified Technicians will send you a parts list! Just follow the guide below and let us know if you have any questions along the way - we're here to help.

One more thing to keep in mind before you move on to the guide - this particular guide is for a freestanding stove being installed in an area without a chimney which will need to pass through a pitched ceiling - like the picture to the left. If you are looking for a different installation setup, please visit our [Measuring Guide page](#) and choose the correct setup.

Once this form is completed, please email it to jwhite@rockfordchimneysupply.com or call us at 866-708-2446

A. Stove Exhaust

- 1a. What fuel is the stove burning? (wood, pellet, gas, etc.)
- 1b. Is the exhaust outlet on the **top** or the **back** of the stove?
- 1c. What is the **inside** measurement of the exhaust hole?
- 1d. Are you planning on installing **single wall** black stove pipe (18" clearance to combustibles) or **double wall** black stove pipe (6" clearance to combustible walls / 8" clearance to combustible ceilings)

B. Offsets

- 1a. Are any offsets (elbows) needed in order to reach the ceiling? We offer 45 and 90 degree.

C. Black Stove Pipe Lengths (used from the stove to the chimney pipe)

- 1a. How many inches of **horizontal** stove pipe is needed?
- 1b. How many inches of **vertical** stove pipe is needed?
- 1c. If using two 45 degree elbows, how many inches of pipe length is needed between the elbows?

D. Class A Chimney Pipe Lengths (used to pass through combustibles and into the outdoors)

- 1a. Is there an occupied living space above the ceiling? If so, how tall of a space do we need to pass through?
- 1b. Is there an attic space above the ceiling? If so, how tall of a space do we need to pass through? Is there insulation in the attic space?
- 1c. How much chimney pipe is needed to protrude above the roofline? [Here is a helpful article.](#)

E. Roofing

- 1a. What material is covering the roof (shingle, metal, etc.)?
- 1b. What is the roof pitch? [Here is a helpful article on measuring roof pitch.](#)

F. Extra Notes

- 1a. Every installation is different and nothing is standard in the chimney world! Please provide any additional information about your setup here if needed.

Note: When ordering, please be sure to allow an extra 1-1/2" for overlap wherever liner sections will be joined together.

IRC, NFP 211, building codes, and local jurisdiction codes are ever changing. It is the installer's responsibility to be sure they are installing their components properly. Any questions about our products can be phoned in to one of our Certified Technicians.
